

# Console Receiver Rack

Model: MC1

Revised: April 2002

## Product Description

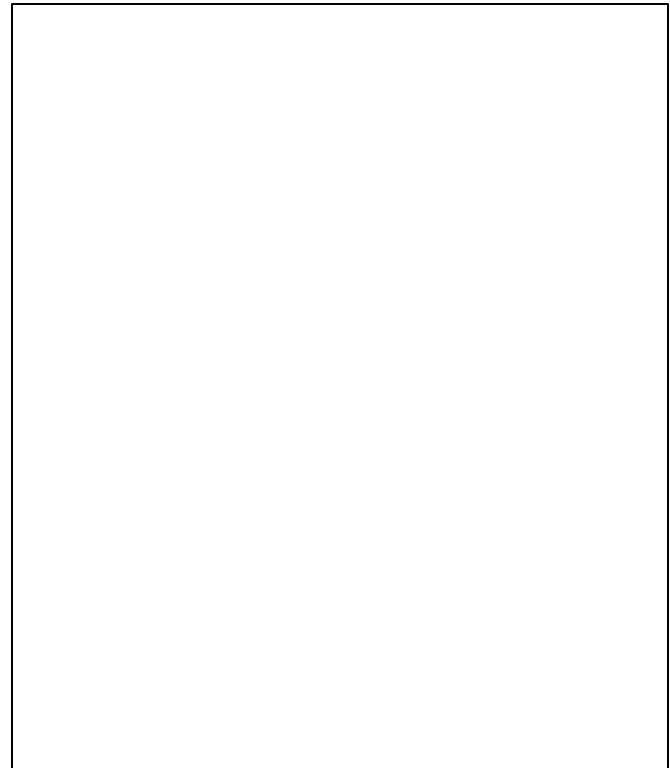

The Model MC1 Monitor Console, Receiver Rack is the enclosure used to house all the electronic components of the alarm monitoring facility part of the Central Alarm Monitoring system. The console is constructed of 16 gauge steel. Two doors are mounted on the Model MC1 console; a front door having cut outs so that the mounting hardware of the installed equipment is concealed and the back door for maintenance access. Both doors are equipped with locks.

## Product Features

The console accepts one Model IMR5-10 or one MR5-10 Receiver Rack, which in turn will accept up to 10 Receiver Modules either Class 'B' (MPB) Series or Class 'A' DES (MP5) Series.

## Optional

- ◆ Console tamper switches and Bell (MCTB-1)

*MC1  
Console, Receiver Rack*
